

NEW DAY DAWN

New Day Dawn – the name stands for Progternative Hard Rock. Whereas the greats in this genre such as Alter Bridge, Staind, Seether and others rely on male vocals, **New Day Dawn** lets its charismatic female vocalist take the lead. Their pleasant sounds and powerful guitar riffs constitute the foundation of a rock show that is on a par with their American role models. The bass player and drummer provide the necessary rhythmic base for their songs – all of which are their own – and prove to be capable of much more than the usual rhythm section.

In 2014 **New Day Dawn** conquered the world with their sophomore EP – Second Floor. By the end of 2015 they again entered the studio to record the new single „With Open Eyes“ for an upcoming music video to be released in April 2016.
